Introduction History-SHELTER (Society of Health Education Legal Training and Emergency Rehabilitation)

Shelter society India is a Nonprofit Organization Management Industry of CSR Funding & NGO

Consultancy in India. Shelter is a pioneer in the fields of NGO Consultancy, CSR Funding, Water,

Sanitation, Health, Education, Environment, Energy, Child Right, Women empowerment and Housing

entitlement Interventions in India to enable house for all and mission for Housing entitlement has opened doors for persons who have no home. Lawyers, Actors, Architects and planners founded Shelter Society in 2000 in Bhubaneswar, India. Shelter society is an informal federation of the poor, work together with local authorities to facilitate the development of basic infrastructure and new housing for the slum dwellers and those living in informal communities.

How we work

Shelter society India simply believes in offering the best with the resources in hand. In India NGO activities are very common but works differently. It first of all scours those who need aid, and reaches those in need

of employment, medication or education. When a person approaches, then Shelter society India applies its motto of being available. In either case whether they reach out, or people reach out to them, Shelter society India verifies the genuineness of the case with the help of its volunteers who aid in verifying the situation. So all those individuals who wish to make a donation and raise fund can approach Shelter society India which helps them to realize their purpose.

So exactly how does the money travel to the deprived and the need? Once an individual or an organization has decided to make a donation, and also donate, then Shelter society India sends a tax receipt for the charity donation made. Your money is sent to the NGO or individual you have chosen. Then after considering all the donation options, the person who would get your donation is earmarked by the NGO , and then the money is used for the charitable activity as deemed fit. Shelter society India also tracks down every charitable donation made and assures that you would get a feedback report. Details of the donation are given and acknowledgement of how your effort to raise a fund has made a difference in society is also made.

Step 1 <http://www.sheltersociety.com>

Step- 2-You have to make a choice as to how you are going to make a donation. Choose the donation options.( It normally takes around a day or two for your online donation to be processed)

Step- 3- Shelter society India sends you receipt which can be used for tax deduction purposes. The amount you have given to raise a fund is then allocated to an NGO or individual.

Step -4-The donation option is considered and the charitable activity is given a shape by allocating it to the right purpose by identifying a beneficiary.

Step -5- Shelter society India then gives a feedback report and informs you about the charitable difference you have made.

To,

Dear, Greetings for the day!!:

I like to take the opportunity to introduce to you "shelter society India" which is registered NGO. India is now witnessing a boom in the NGO sector with population of the country which could well be the land of opportunities for non-governmental organizations (NGOs), but at the same time it becomes difficult for NGOs to sustain and work according to their objective. Shelter society India works with the aim to bring together NGOs under one roof where NGOs can exchange idea, voluntary and financial support so that they grow in a smooth way.

For benefits Please go thorough the attachment above and interested NGOs are requested to revert back with the filled registration form to process further. Looking forward to be associated with your NGO for a social cause.

Together we can make a difference!!

Thanks & Regards,

Project In-charge

### **-Project proposal on CSR Policy and Activities**

As per New Indian companies act, central government has announced CSR rules 2013 which shall come into force on the date of their publication in the official gazette and shall be applicable from the financial year 2014 -15. Corporate social Responsibility (CSR) is a useful tool of development of corporate culture, and image. It makes more favorable the corporate image and helps building advantageous relations. Deliberate customers are more and more influenced about what kind of role a company takes in order to solve society problems. The well-organized CSR activity or partnership with the developing organizations is also good assets of Inside Public Relations activity, because they raises the company' pride and loyalty. So we can say that sponsorship and donation are part of public relations. This is an investment into an activity, and the return is direct or indirect business success.

There are many reasons for the companies to operate socially responsibility. For the potential customers, investors, market analyzers' and business partners, participation in social issues affects always positively, and it also looks good in the annual report and in the news. Besides

this, CSR arouses good feelings in the employees, customers, investors, among the members of the management, and hereby it is good for the brand, financial statement and for the community as well.
